

New Theatre Complex, Clatterbridge Hospital

The client required to increase the theatre activity to reduce waiting times for treatment.

The client required 2 additional theatres to complement the existing 6 already on-site during phase 1. Updated modern Theatres for multi-use operations, along with first stage recovery bays, ancillary spaces such as dirty and clean utility rooms, staff changing and rest rooms with sufficient storage to manage all 4 theatres. Phase 2 will see the Introduction of 2 additional theatres to compliment phase 1.

Phase 1 was completed inside 13 months from design to the first operation. Increased theatres activity has seen an additional 3000 operations completed since Phase 1 was completed. Phase 2 will provide a further increase in theatre activity as well as additional recovery and ancillary areas, additional recovery bays. Proactively managing the design team and liaising closely with the clinical team and stakeholders. Key control mechanisms are put in place for this project such as Change Control Forms, Request for Information, Monthly Reporting, and regular site visits. Liaise with IPC for approvals on hoardings, organise permits for isolation with estates. Chair and minute monthly progress meetings Take photographic evidence of works incl. fire stopping. Organise site visits with relevant trust AP / AE's.
