

# AARON CHAN

## Project Manager

Aaron has recently joined us having moved from New Zealand. Aaron is a proficient Project Manager and former Chartered Building Services Mechanical Engineer with extensive experience across a variety of sectors, including commercial, government, healthcare, and heritage. Having earned his qualifications in New Zealand, he has brought his vast experience and engineering expertise to DAY Project Management. With a solid background in mechanical engineering design and documentation, Aaron has developed a deep understanding of the complexities involved in successful project delivery. He emphasizes the importance of team collaboration to ensure seamless project execution. Aaron is detail orientated and employs a diplomatic approach combined with strong problem-solving to consistently lead projects to successful completion, on time, and within budget.

Aaron has worked on a cooling upgrade project and a new site water pump facility for NCA, an electrical infrastructure upgrade project for MFT, and is currently working on a CT scanner replacement scheme and providing support on three new build fire stations for GMCA and GMFRS.
