

Jonathan Peter

Associate Director

I have spent the last 3 years prior to joining DAY PM as a Principal Consultant. My primary role was Client side PM Lead for GMCA delivering circa 3 million pounds worth of capital works across the GMFRS wider estate. I have also led a large multisite land remediation programme within Stalybridge supporting TMBC for commercial & residential development.

Prior to this I have worked for a number of large Tier 1 contractors within the North West as a pre-construction/Bid Manager.

I have over 20 years of experience and a proven capability in delivering winning, multi-valued projects as Project Lead in the preconstruction phase, working across multiple sectors and project values, leading the internal bid & preconstruction teams, external consultants, specialist subcontractors and other project stakeholder inputs from inception, through to tender submission and contract award. I have a proven track record in delivering successful single and two stage tenders.

I Excel at building relationships working alongside client teams, local authorities, external agencies, multi- disciplinary teams, and wider stakeholders.
