

PAUL KEANE

Senior Project Manager

Paul is an experienced construction and project professional with a proven track record delivering complex projects across automotive, communications, rail, defence, and more recently education and healthcare sectors. I pride myself on my ability to communicate well at all levels in a confident manner. Experienced in stakeholder management, budget control, programme management, with strong commercial awareness and commitment to quality and value engineering.

Paul started his career as an apprentice joiner through a CITB apprenticeship with Fairclough Civil Engineering, subsequently becoming Amec Civil Engineering. Paul has worked as a Project Manager in both, major capital expenditure and minor works. He was a Project Manager on large capital expenditure projects for Jaguar Land Rover, such as the Gaydon Triangle, an office development with a capacity for three thousand occupants integrating Land Rover and Jaguar products into one facility. He has also project managed large transformation projects for Bae Systems and MBDA Missile Systems. Whilst working in the above roles Paul has managed to achieve his NVQ level 6 and level 7 in Construction Management, ultimately providing a pathway to membership to the CIOB.

Paul has a proven track record in project management, and he has consistently delivered on time and within budget. Whilst being fortunate to have worked for several blue-chip organisations, Paul has also gained several Health and Safety competencies such as Neobosh, CITB SMSTS, CITB TWC.

Paul is also fortunate to have worked both client side and contractor side which he believes always adds benefit to any projects that he manages.
